Sapienza University of Rome

Safety & Security Group

This group is made up by different realities, from small and medium enterprises to the academic world (Sapienza University and Wessex Institute of Technology) and the medical-psychiatrist field

Activities the group does

- several project works in Italy and classes in the course of "Safety engineering" and "Security engineering and civil protection" at Sapienza University,
- classes of higher education in the safety field,
- master classes,
- specialization courses at Wessex Institute of Technology (UK).,
- Risk analysis,
- Reliability analysis,
- Emergency plans,
- Disaster Recovery Plan,
- Cost / benefit analysis,
- Feasibility studies',
- Management Systems,
- Plant and systems security,
- Safety of communication and information systems,
- Fire protection Design and explosion prevention,
- Counter Terrorism,
- Critical Infrastructure,
- Nuclear, bacteriological and chemical risk protection,
- Psychology of safety, emergency and risk.

Other activities

- international books,
- international journal of safety and security engineering,
- international conference on safety and security engineering,
- IEEE International Carnahan Conference on Security Technology.

This group is not a laboratory, it is rather a group of professionals with different competencies and abilities, who cover (through its work) security and safety engineering issues.
